

# Cover Crop Seeding Date Comparison

5 Different cover crop mixes were sown on two different dates: June 7th and June 30th. Relay Mix, Pinpoint Mix, All Brassica Mix, Peace Diverse Mix and a Blend. As you can see in the picture, the earlier seeding date was well ahead of the later-seeded treatment. Samples were taken on October 28th of the Relay Mix sown at both dates and submitted for nutrient analysis—results in tables below.
