

FIVE SOIL HEALTH RESEARCH INTERN POSITIONS AVAILABLE

Gain field experience in innovative cropping practices

- ✓ NPARA has been conducting research projects on soil health and regenerative agriculture since 2012.

Participate in agricultural extension activities

- ✓ NPARA conducts three field tours in the growing season and regularly brings in guest speakers to teach field schools and workshops on regenerative agricultural practices.

Explore a new part of the country

- ✓ Close to three beautiful provincial parks: Green Valley, Peace River Wildland, and Notikewin.

What about lodging and accommodations

- ✓ NPARA staff will help facilitate a room and board.

The North Peace Applied Research Association (NPARA) is a non-profit agricultural organization at Manning, in the Peace River Country of northern Alberta. Producer driven, NPARA conducts applied agricultural research and extension programs in the North Peace. The intern will assist in seeding, maintenance, data collection, sampling, harvest and reporting on all soil health projects, inter-seeding demonstrations, interim and final report preparation and other duties as assigned. **The position is for up to 16 weeks and the start date is May 1st, 2023.** NPARA staff will provide training and assistance to ensure that interns receive a great learning experience. **Salary is \$18/hour. Standard work week is 37.5 hours. Flexibility for time off; overtime hours can be banked and used as time in lieu.**

Qualifications:

- Student (Degree or Diploma) in Agriculture, Environmental Sciences or related field.
- Driven to learn more about field research with various stakeholders (producers, agri-business, government, and academia).
- Excellent written and communication skills, and attention to detail.
- Related experience in agricultural research would be an asset.
- Be a Canadian citizen or permanent resident of Canada

* Only individuals selected for an interview will be contacted.
